

SPECIAL RELEASE

Highlights of the 2018 Municipal and City Level Poverty Estimates for Northern Mindanao

Date of Release: 08March 2022
 Reference No. PSAX-SR-2022-08

Municipality of Opol, Misamis Oriental recorded the lowest poverty incidence

In 2018, 31.9 percent of the 91 municipalities and component cities in the region were classified as Level 5, which refers to those with poverty incidences of at most 20.0 percent. This is equivalent to 29 municipalities and cities. Twenty-one of these cities and municipalities were from the province of Misamis Oriental. The municipality of Opol in Misamis Oriental recorded the lowest poverty incidence in the region. (Table 1)

Table 1. Region X Cities and Municipalities with At Most 20.0% Poverty Incidence, 2018

Province	Municipality/ City	Poverty Incidence	Province	Municipality/ City	Poverty Incidence
LDN	Baroy	17.1	Mis Or	Kinoguitan	17.1
LDN	Kapatagan	17.8	Mis Or	Lagonglong	18.9
LDN	Kolambugan	18.6	Mis Or	Laguindingan	15.2
LDN	Lala	18.5	Mis Or	Libertad	17.9
LDN	Maigo	18.8	Mis Or	Lugait	14.1
LDN	Tubod	18.1	Mis Or	Manticao	17.7
Mis Oc	Oroquieta City	15.6	Mis Or	Medina	18.2
Mis Oc	Panaon	18.1	Mis Or	Naawan	16.7
Mis Or	Alubijid	14.9	Mis Or	Opol	12.7
Mis Or	Balingoan	18.5	Mis Or	Salay	17.3
Mis Or	Binuangan	17.1	Mis Or	Sugbongcogon	17.9
Mis Or	El Salvador City	13.3	Mis Or	Tagoloan	16.8
Mis Or	Gitagum	15.8	Mis Or	Talisayan	19.9
Mis Or	Initao	17.0	Mis Or	Villanueva	16.0
Mis Or	Jasaan	16.7

Majority of the municipalities and cities were categorized as Level 4

About 60.4 percent of the municipalities and component cities in the region were Level 4 or with poverty incidence more than 20.0 percent and up to 40.0 percent. For Level 3 or with poverty incidence more than 40.0 percent to 60.0 percent, about 7.7 percent of the municipalities and cities in the region belonged to this group. No city or municipality belonged to the extreme end of the distribution or in Level 1. (Figure 1)

Figure 1. Percentage Distribution of the 2018 Municipal and City Level Poverty Incidence Estimates* by Poverty Classification, Region X

* Excluding highly urbanized cities. Their estimates are available in the 2018 Official Poverty Statistics.

Majority of the Level 3 municipalities were in Lanao del Norte, Poona Piagapo posted highest poverty incidence

Most of the municipalities in Level 3 were from the province of Lanao del Norte with the municipality of Poona Piagapo recording the highest poverty incidence among the municipalities and component cities of Region X. (Table 2)

Table 2. Region X Cities and Municipalities with More Than 40.0% to 60.0% Poverty Incidence, 2018

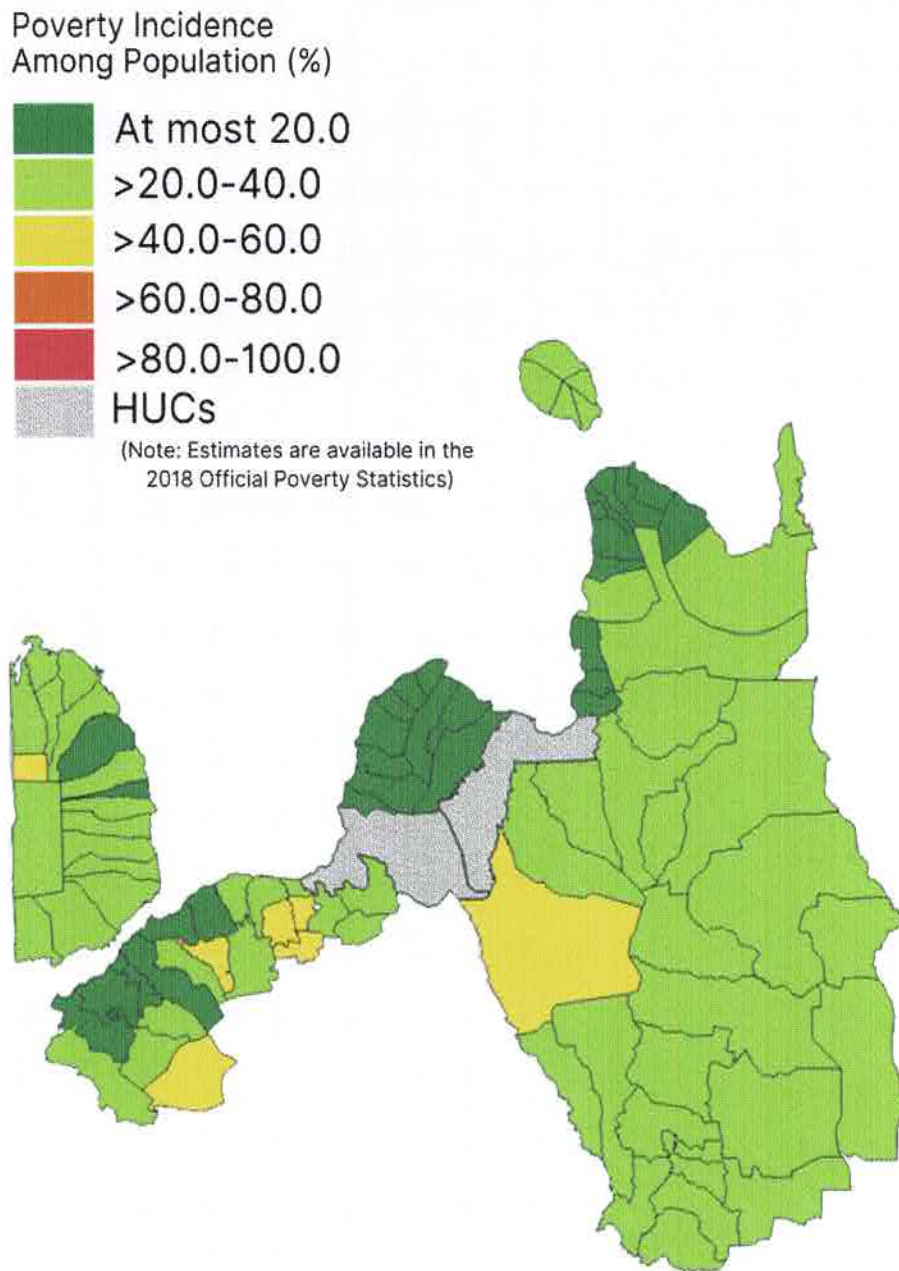

Province	Municipality	Poverty Incidence
Bukidnon	Talakag	43.4
Lanao del Norte	Matungao	41.0
Lanao del Norte	Nunungan	44.2
Lanao del Norte	Pantao Ragat	42.5
Lanao del Norte	Poona Piagapo	51.4
Lanao del Norte	Tangcal	44.1
Misamis Occidental	Concepcion	49.9

The poverty map in Figure 2 presents the poverty classification of the municipalities and cities in Region X wherein areas shaded in dark green refer to Level 5, light green for Level 4, yellow for Level 3, orange for Level 2, and red for Level 1.

It can be seen that majority of the municipalities and cities in Misamis Oriental were shaded dark green and a few were shaded light green. Meanwhile, in Bukidnon, most areas were shaded light green and only one was shaded yellow in Talakag. All areas in Camiguin were shaded light green. (Figure 2)

In the case of Lanao del Norte and Misamis Occidental, areas were shaded in three colors. Majority of these areas were shaded light green. However, five areas in Lanao del Norte were shaded yellow while one yellow area in Misamis Occidental. (Figure 2)

Figure 2. Map of Small Area Estimates of Poverty in Region X: 2018

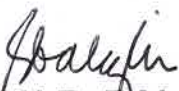

The release of the 2018 Municipal and City Level Poverty Estimates is a follow-up study to the earlier projects conducted by PSA (including those Small Area Estimation projects of the former National Statistical Coordination Board) which resulted to the release of 2000, 2003, 2006, 2009, 2012, and 2015 poverty estimates using the Small Area Estimation (SAE) technique developed by World Bank called the Elbers, Lanjouw, and Lanjouw (ELL) methodology.

The SAE methodology employed in the generation of the 2018 municipal and city level poverty estimates combined the 2015 Census of Population and the merged 2018 Family Income and Expenditure Survey and January 2019 round of the Labor Force Survey to produce reliable poverty estimates at lower levels of geographic disaggregation.

The 2018 SAE of Poverty produces estimates for the 14 sub-municipalities of the City of Manila, 110 cities, and 1,487 municipalities with corresponding standard errors, coefficients of variation, and confidence intervals. Full SAE table can be downloaded from <https://psa.gov.ph/poverty-sae-press-releases/data>.
